

LEADING THE WAY PLANTING TREES

THE BENEFITS

AIR

They produce oxygen and In addition to absorbing CO₂, trees also absorb harmful pollutant gases

CLIMATE

Reforestation lessens climate change by storing CO₂

WATER

Trees purify water and slow down rain by filtering it with their roots.

SOIL

Trees purify water Trees make soil less vulnerable to erosion. The tree canopy also provides protection for the soil underneath.

FAUNA

As many as 100 species a day could go extinct from the loss of closed tropical rainforests.

SOCIAL

Many of the world's extreme poor live close to a forested area, relying on it for sources of food, drink and equipment

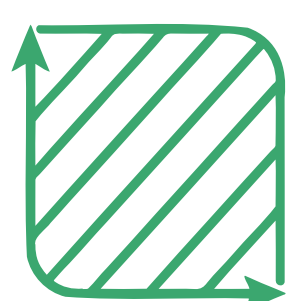

OUR IMPACT TO DATE

BANKERS BOX® have been working with tree-nation since 2019.
This is the environmental impact of our forest

106178

Total planted

92.19 hectares

Total reforested

28913.44 tonnes

Total CO₂ captured

THE FUTURE

From 1st January 2023 BANKERS BOX® have moved to only planting trees in projects that are independently certified. This ensures we are able to accurately validate any claims we make against our CO₂ offset
