

THE BAMBOO BULLETIN

**WHAT'S BAMBOO
GOT TO DO WITH
BIODIVERSITY?**

The background of the image is white, framed by various green shapes that resemble leaves and plant stems. These shapes are scattered around the central text, with some appearing as solid green and others with a textured, mottled green pattern. The shapes include rounded rectangles, elongated vertical bars, and curved leaf-like forms.

**A: Everything. It
grows fast, doesn't
need replanting, and
gives ecosystems a
chance to breathe
(literally).**

The background features various green shapes resembling leaves and plant stems, scattered around the central text. These shapes are in different shades of green, from light lime to dark forest green, and have a slightly textured, painterly appearance. Some are solid colors, while others have subtle gradients or patterns.

**Q: Isn't biodiversity
just a fancy word for
'loads of animals'?**

If I win the lottery I
probably won't tell anyone...
but there will be signs.

**A: Yes. But it's also
plants, fungi,
microbes – basically,
life doing its weird,
wonderful thing.
Biodiversity keeps our
food growing, our air
clean, and our planet
in one piece.**

The background features several stylized green shapes that resemble bamboo leaves and stems, arranged around the central text. These shapes are in various shades of green and have a textured, slightly mottled appearance.

**Q: And bamboo helps
with that?**

**A: You better
bamboo-believe it.
Bamboo prevents
deforestation,
protects habitats, and
captures more carbon
than your average
tree.**

The image features a white background with several green bamboo leaves and stalks arranged around the central text. The leaves are in various shades of green, from light to dark, and are positioned at the top, bottom, and sides of the frame. The stalks are vertical and have a textured, slightly mottled appearance. The text is centered and reads:

**Q: So... why isn't
everyone using
bamboo?**

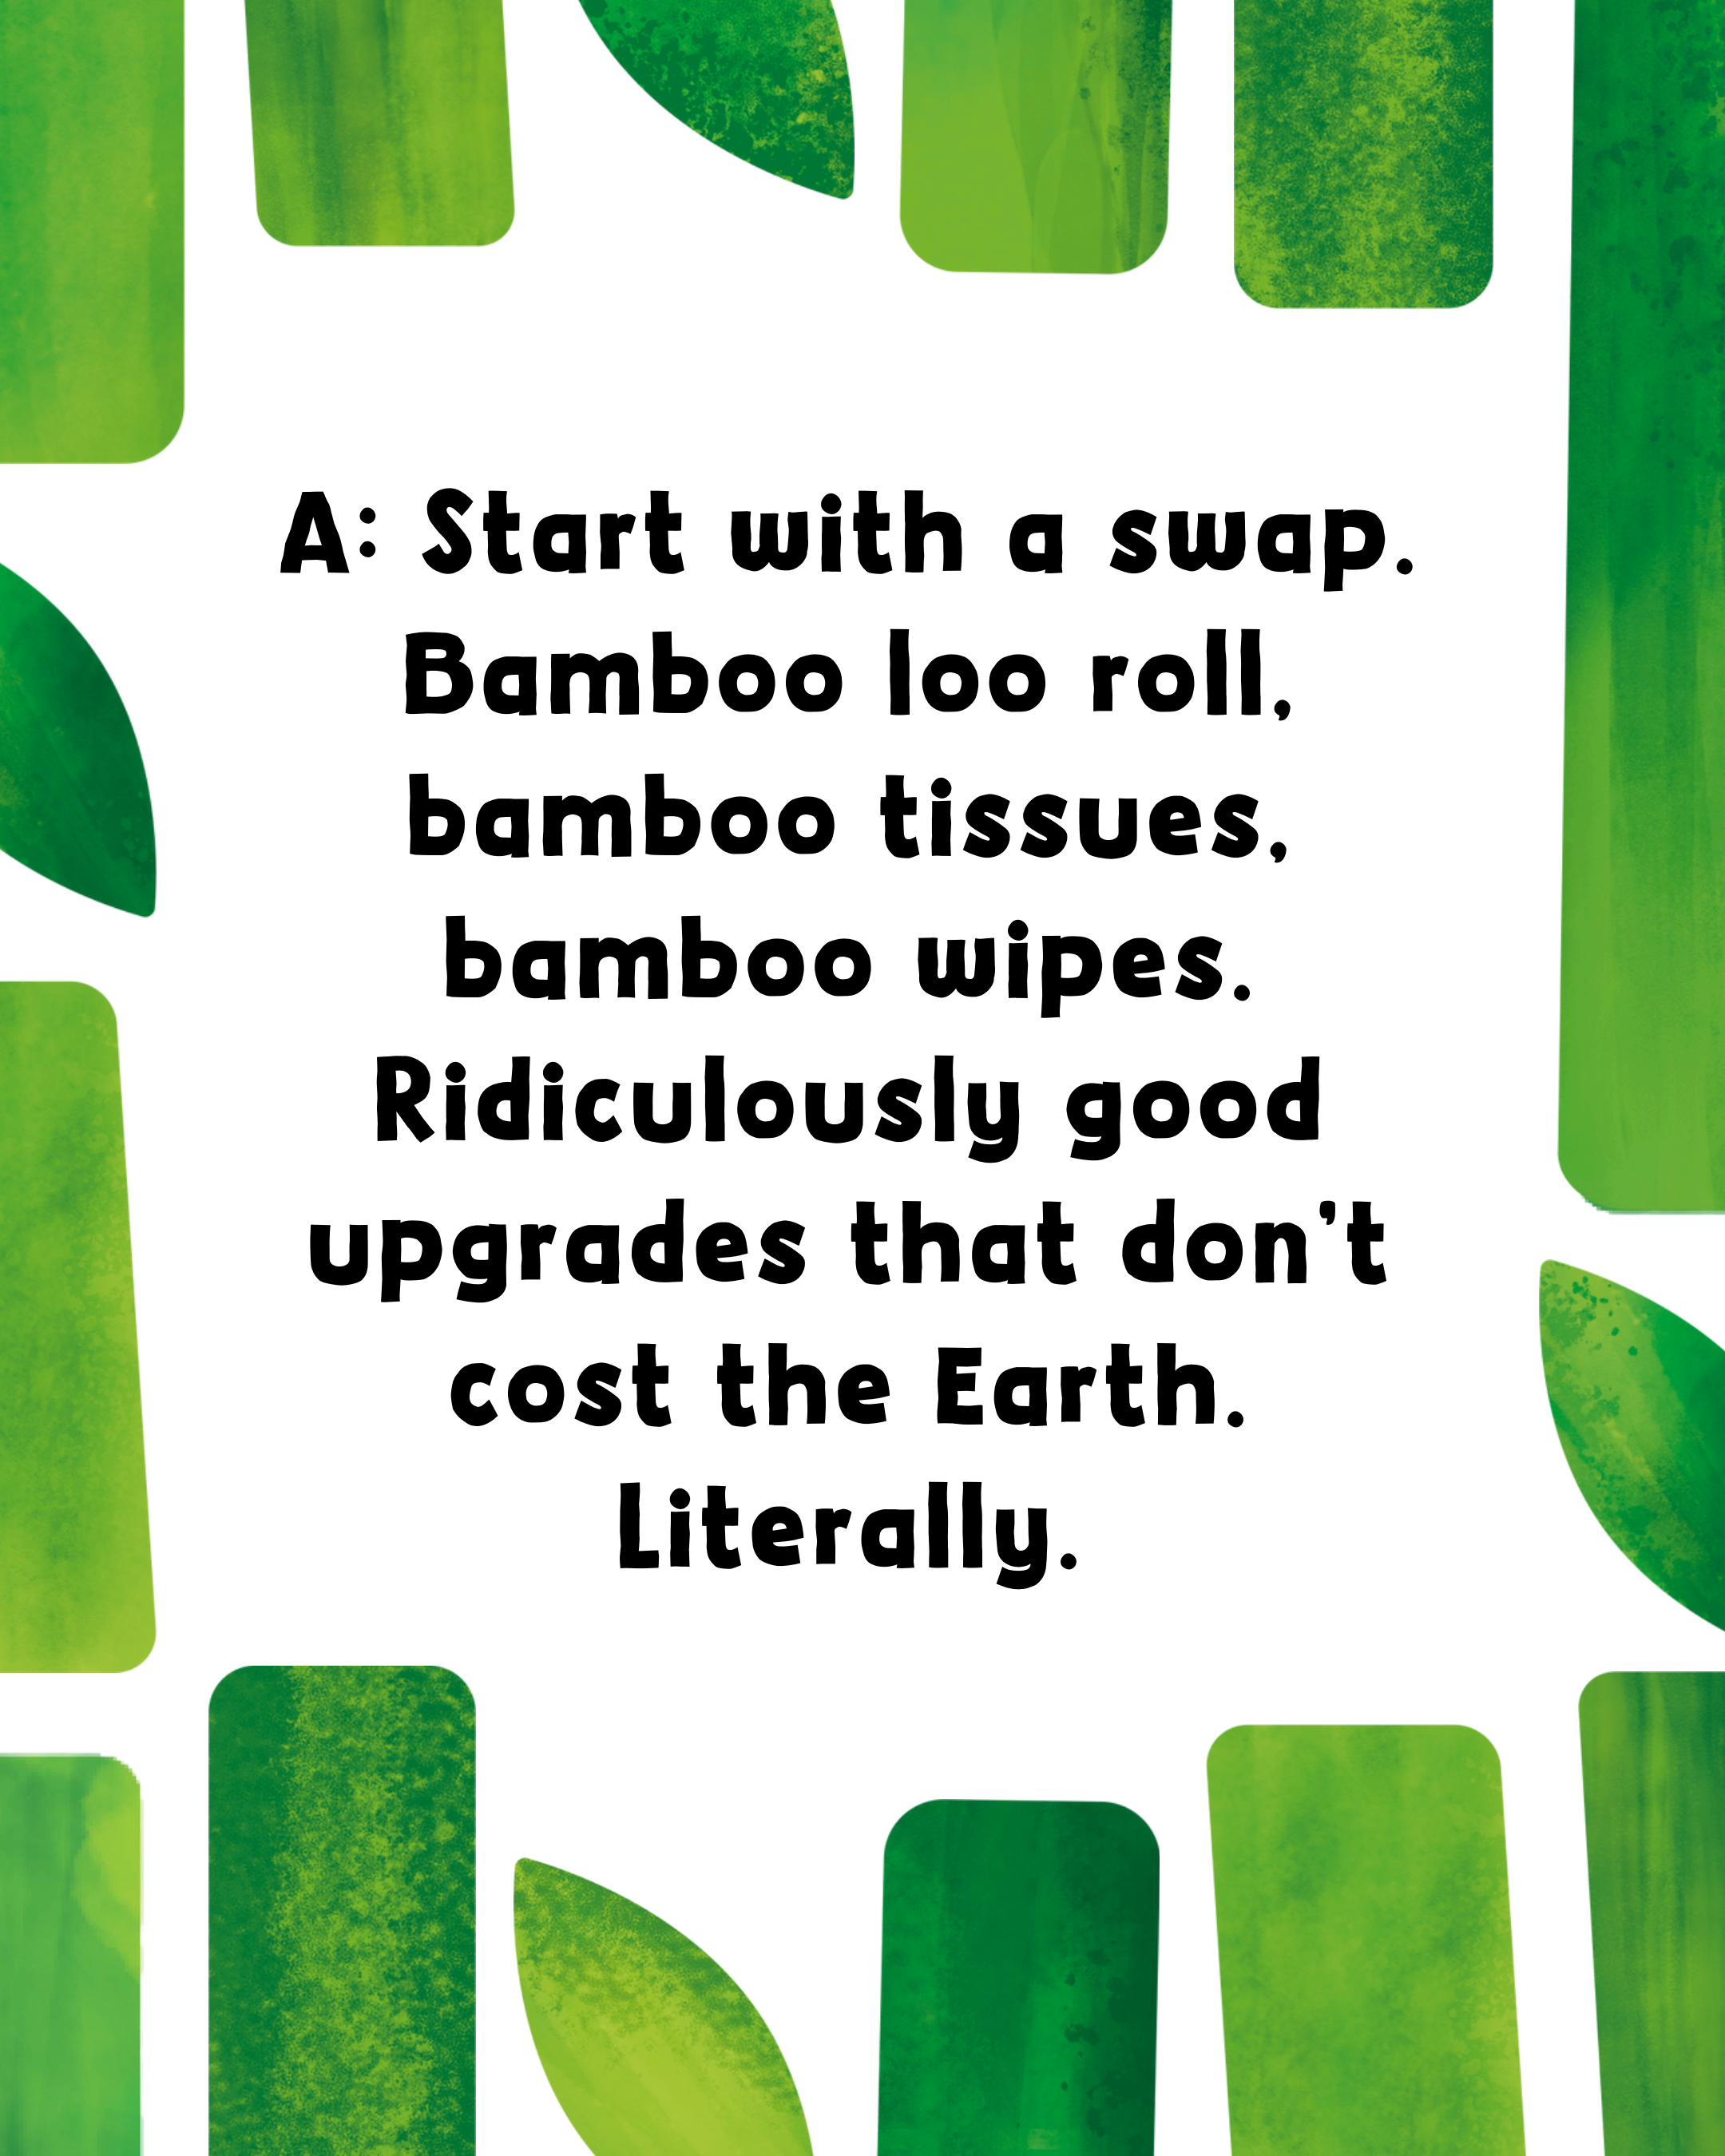

The image features several stylized green leaf shapes of various sizes and orientations scattered around the text. Some leaves are solid green, while others have a mottled or textured appearance. They are positioned in the corners and along the edges of the frame, creating a natural, organic border.

A: Old habits. Lazy brands. People still think trees grow back overnight.

Spoiler: they don't.

The page is framed by a decorative border of various green elements. At the top, there are several rectangular pieces of light green paper with rounded corners, interspersed with darker green leaf shapes. On the right side, a long, vertical light green paper strip is visible. The bottom edge features a mix of light green paper scraps and dark green leaf fragments. The central text is set against a plain white background.

Q: What can I do?

**A: Start with a swap.
Bamboo loo roll,
bamboo tissues,
bamboo wipes.
Ridiculously good
upgrades that don't
cost the Earth.
Literally.**

**PANDA-APPROVED.
PLANET-ENDORSED.
BIODIVERSITY BACKED.**
