

# It's time to print everything in green.

From home devices  
to inkjet production printers  
and everything in between.

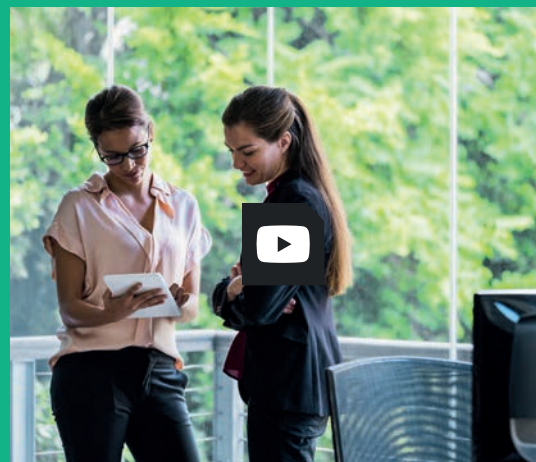

[kyoceradocumentsolutions.co.uk](https://www.kyoceradocumentsolutions.co.uk)

We're committed to helping our customers with their green goals by developing carbon neutral printing initiatives.

Kyocera has long been committed as both a company and a manufacturer to delivering more sustainable and environmentally conscious print solutions. Our culture of care and range of forward-thinking products and services offer a real alternative for those looking to change and demonstrate a new and sustainable way of working.

# Carbon neutral printers & MFPs from a carbon neutral business.

Discover why Kyocera's carbon neutral print promise is good for everyone.

## Every product. Carbon neutral.

Every product in our range — from the smallest desktop laser printer to the biggest cut-sheet inkjet production printer can now be carbon neutral.

Whether you're looking for new devices or to refresh your printer fleet, choosing Kyocera as your carbon neutral partner will enable you to reduce costs and your environmental impact in line with your green goals.

We can now offer our UK customers the option to carbon offset all Kyocera printers and MFPs.

We offset your devices, plus the consumables they use over the lifetime\* of the product, through a simple bolt-on to the device purchase. This covers all elements of production, packaging, transportation and consumables.

Our eco-conscious toner and device recycling programmes close the loop.

Auditable and traceable certification.

Demonstrate your investment and commitment to climate action with a certificate of authenticity from myclimate.

A carbon neutral certificate is available for all customers registering their devices online through our simple 4-step process.

Registering your device

## From home devices to inkjet production printers and everything in between.

Carbon neutral printers & MFPs

# Putting the environment at the heart of innovation.

It's not just about the offsetting, Kyocera has been designing eco-conscious technology since 1992.

We design with the environment in mind to deliver highly reliable products that reduce the use of natural resources and drive down CO2. We put our expertise in long-life ceramics at the heart of our technology so customers can benefit from a low total cost of ownership. The result is printers and MFPs that cost you and the environment less.

Here's some more great reasons to choose Kyocera for carbon neutral printing.

- + Eco toner saves energy
- + Energy efficient power modes
- + Advanced power management
- + Energy saving design
- + Ecological packaging
- + Easy to recycle
- + Single-use plastic reduction
- + Long-life consumables

## How are we offsetting the carbon?

We carbon offset your devices through myclimate, the same partner we use to offset our own UK business operations in pursuit of net zero.

myclimate will invest in Gold Standard climate protection initiatives on your behalf.

We've hand-picked three projects that are certified for their sustainable development factors and reflect our company ethos **"to do what is right as a human being."**

## Printing doesn't have to cost the earth.

# Join us on our journey to a greener future.

It's a marathon, not a sprint.

At Kyocera, we're on a sustainability journey. We offset our carbon footprint, we reforest all the paper we use in our UK business operations, we reforest the paper used by TASKalfa Pro 15000c inkjet production printer customers.

Achieving carbon neutrality was an important milestone. Since 2022 we've offset our UK operations' CO2 emissions and are now taking extra steps to reduce our impact on the environment. What's more we recognise that climate change is a challenge that faces us all — that's why we invite you to join us on our journey to a greener future.

We are committed to achieving Net Zero.

We are already carbon neutral as an operation in the UK, but we know this is not good enough. Therefore, we are committed to supporting the UK's target to achieve net zero emissions by 2050.

How we are going about this

Building a sustainable business.
