customer's pocket.

Energy
Efficient

Electricity
costs cut

Helps mitigate green
house gas emissions.

Eco-conscious, streamlined product design

Lower power consumption to mitigate the emissions of greenhouse gases is one tenet of Kyocera's 'Reduce, Reuse, Recycle' design approach, which is focussed on minimising energy related costs for the customer.

Energy saving toner

Kyocera toner fuses on the page at a lower temperature reducing power consumption when printing by up to 50%.

Energy saving controller

Stand-by power used during Sleep Mode is kept below 0.5W without compromising user productivity.

Eco-print

In this mode users can cut electricity by 30% by choosing to reduce the output speed.

More energy saving reasons to choose Kyocera:

- + Energy efficient power modes
- + Intelligent power management
- + Fewer fans & motors
- + Solid state drives

**Please refer to the individual product specification for the exact energy saving functions offered.*
